

# A revolution in interior design.

## 3M™ DI-NOC™ Architectural Finishes

### An innovative, flexible design solution for refurbishment.

Breathe life into outdated fixtures and get creative flexibility on your new projects with 3M™ DI-NOC™ Architectural Finishes.

With over 1000 patterns to choose from, the design options are virtually limitless. These dynamic finishes transform spaces and can be applied almost anywhere: from walls and ceilings to fittings, furniture and doors. With a sophisticated, high-end look that will last up to 12 years, they're durable and let you revitalise any space.

DI-NOC Architectural Finishes are quick to install and more cost effective than traditional

refurbishment methods as well as being less labour-intensive and wasteful. DI-NOC finishes are up to ten times more wear-resistant than paint and wood.\*

Easy to clean and quick to repair, DI-NOC finishes are a low-maintenance, low-weight alternative to heavy-duty woods, metals, resins and plastics. If scuffed or damaged, they can be quickly repaired without the need to replace the entire panel or product. DI-NOC finishes are also a sustainable solution and may qualify for LEED certification credits.

# Care Homes

Have your care home make a lasting first impression on prospective residents and families with 3M™ DI-NOC™ Architectural Finishes. Refresh tired interiors and transform them into warm, refined spaces that make visitors feel welcome.

Time constraints can make updating rooms a real struggle, with traditional renovation projects often leaving them unoccupied. Noise, dust and fumes are likely to disturb residents, and moving them between rooms or to other care homes during remodelling can be unsettling. With DI-NOC Architectural Finishes you can renovate rooms and liven up communal spaces and staff areas with minimal disruption.

DI-NOC finishes help you support the needs of your

residents. There are over 1000 designs available, including a range of bright, solid colours. They can be used on doors, handrails or skirting boards to create contrasting navigational cues, encouraging wayfinding and aiding residents with dementia or visual impairments.

Revitalise your interior spaces and bring old fixtures back to life with DI-NOC finishes. Register for a sample, request a call from an expert or find your local 3M endorsed installer at [www.3M.co.uk/architectural](http://www.3M.co.uk/architectural).
