The New Generation of Wrapping Tools

SIRVISUAL.COM

QUADRA

CUTTING MACHINE

QUADRA is the new Patented Cutter from Oxy Tools specifically designed for all operators engaged in the ambits of Window Films, Car & Boat Wrapping, Interior Design and Graphic design in general. **Portable and extremely lightweight** (18/20 kg), with a maximum roll cutting light of 156/186 cm (61,4"/73,2"), it enables you to cut different types of film of varying thicknesses ranging from 30 to 200 µm, either lengthwise or widthwise, with millimetric precision (width) and centimetre precision (length).

Fully manual, it works without electricity and is therefore ideal for on site or laboratory use.

PRO-CUTTER

FLOCK

A range of 4 professional cutters, one with rechargeable blade and three with single blade. These cutters feature a **special velvet cover** and can be used with gloves while performing wet operations without having to worry about the cutter slipping off your hand.

They are totally non scratching and can be had in 3 different colours to help you distinguish the blades inserted.

SPILLY

The tool that was not there, necessary to give stability to the cutting wires in tight bends where often the wires come out of their seat, compromising the positioning of the wire and the work itself.

A kit consisting of 3 "sticks" and 5 ball-point with increasing diameters, also useful for handling the wrapping seals or for highlighting designs and logos in 3D decorations.

SMART BELT

A simple, but very useful, accessory dedicated to the **protection of the body** through the lining of the belt buckle.

A special material, made of a sandwich of velcro-neoprene-elastic fabric, guarantees protection and slipping on the paint of the car.

Fast and practical to wear, it fits all belts.

Do not risk anymore!!

HULK

WRAPPING MAGNET

Fully covered with hand-sewn **genuine leather** and with **25 kg magnetic power**, these new magnets whose shape is totally different from that of traditional magnets, offer a new way to secure the vinyl to the vehicle body during the wrapping process.

Thanks to their flat, rectangular shape, they do not hinder the application process and adhere tightly to each corner of the vehicle body, something that traditional magnets are unable to do.

REVOLUTION WRAPPING GLOVE

This incredible glove has surprising characteristics compared with any other model available in the market: it offers a **"wet sensation"** and has a sliding power four times as high as the gloves commonly used in the world of Wrapping. Moreover, it is 4 times more wear resistant and cut-proof. Available in **sizes: S - M - L - XL**.

JEKO TAPE RULE

A Professional Patented Tape Rule specifically made for Car Wrapping, Window Film and Interior Design professionals. Entirely made from non-scratch plastic material which prevents damage during use to surfaces such as: car bodywork, window panes and furniture, the Jeko Tape Rule offers an **innovative system of suction pad blockage** which enables operators to work on their own as they accurately and rapidly measure surfaces in total safety.

METROTAC STRAIGHT

Metric system for the construction and replication of graphs through the use of cutting wires on vehicles and boats. Made of a special inextensible material with highly removable adhesive. Washable and reusable for many times.

ROCKET 1 **NEW** SQUEEGEE STRIPS

Candy Lunghezza: 10 cm (4") (25 Pz.) & **Roll** Dimensione: 5cm x 5m (2"x 5.5yd)

The adhesive profiles that are applied on the spatulas have the purpose of increasing the slipperiness of the same, preserving the film and ensuring adequate sensitivity and the right feeling for the applicator. The evolution of the films and the different application activities, require a careful and technical research of the "fabrics" suitable to guarantee all this. Recommended for applications of: **PPF - Window Film - Car & Boat Wrapping.**

ROCKET 2 **NEW** SQUEEGEE STRIPS

Candy Lunghezza: 10 cm (4") (20 Pz.) & **Roll** Dimensione: 5cm x 5m (2"x 5.5yd)

The adhesive profiles that are applied on the spatulas have the purpose of increasing the slipperiness of the same, preserving the film and ensuring adequate sensitivity and the right feeling for the applicator. The evolution of the films and the different application activities, require a careful and technical research of the "fabrics" suitable to guarantee all this. Recommended for applications of: **Interior Design - 3D Graphics - Car & Boat Wrapping.**

MANIAC

NEW

PPF COVER WHEELS

Car Wrapping, PPF, Windows Tint, Car Care and more, are all activities that require maximum cleanliness of the car and the environment in which you operate. Tire, rim wheel, wheel hub, discs and brake calipers, probably represent the most saturated parts of impurities. A good wash can remove the soil present in the area but it cannot remove the ferodo powder, often responsible for the dirty spots we find under the films. Do not overlook the problems deriving from the presence of polishing products ("oil black rubber") on the carcasses of the tires.

For these reasons, the "MANIAC" wheel cover by OXY TOOLS is born! Available in two sizes

TANK

NEW

WRAPPING RAMPS

Made of a plastic polymer, these ramps has a 17° ramp angle and will lift your vehicle 6.5" off the ground. It has a rubber pad under the front of the ramp to help prevent slippage when you first drive onto it and they can handle tires with a tread contact patch of 9" in width.

STORM TANK

PRESSURIZED SPRAY

Pressurized stainless steel tank of 9 and 18 Lt. supplied with 4mt expanded polyurethane hose and professional nozzle with nozzle dedicated to the application of adhesive materials. Designed to be durable, durable and portable, it has a large removable lid perfect for loading the application liquid, for emptying and cleaning. It is equipped with a quick coupling for connection to an air compressor (of any type - even 12V) and is equipped with a calibrated safety valve (8 bar).

TOOLS BOX

A hermetic suitcase, padded and extremely resistant to impact, perfect to protect and transport some of the OXY tools necessary for everyday application.

With this suitcase you will never be left without your favorite instrument.

Wrapping is increasingly an activity carried out by two or more applicators, so the kit contains the tools necessary for a pair of wrappers.

TOOLS BOX allows you to always have the equipment ordered, available at the beginning of the day and to be stored at the end of the work, useful for checking the equipment and checking any tools to be reordered such as cutter blades or Revolution gloves.

MODULO

NEW

YOUR PERSONAL ASSISTANT

Working with "MODULO" on your side means having the necessary equipment immediately available reducing what we have to "wear", increasing comfort, quality, profitability and reducing work times. "MODULO" is a customizable product, in fact in addition to the many types of equipment obtainable with OXY accessories, the user can easily apply hooks, plates, supports and more simply by inserting threaded bushes, available as accessories, into the structure. The possibility of electrifying MODULO through the application of a 220V industrial socket connect polishing machines, sanders, heat-gun, lamps and much more.
