Introducing 3M™ 80347 Paintshop Handwipes

3M™ 80347 Paintshop Handwipes are supplied in a dispenser tub containing 100 wipes. Measuring 270 x 280mm, each double-layered wipe is pre-impregnated with a cleanser including Lanolin, specially formulated to tackle hand cleaning problems commonly encountered in the paintshop, e.g. the removal of wet or dry automotive paint (including 2-pack), oils, fillers, sealants and adhesives.

One side of the textured cloth provides a gentle scrubbing action to help clean the hands. The reverse side is smooth, and used for drying off, leaving the hands clean and moisturised with natural oils.

Non allergenic and completely safe to the skin, 3M™ 80347 Paintshop Handwipes do not require water or any other cleaning agent, and hands dry quickly after use.
